**Run Your Business with Intelligent Autonomy**

Next-Gen BI for Confident Decisions

Create intuitive dashboards, uncover insights with AI, and collaborate seamlessly, all in a secure, on-premise environment where your data never leaves your infrastructure.

From Raw Data to Business Insight

Connect Your Data

Link LUCA BDS to your preferred data source including SQL, APIs, and logs for instant and secure access.

Define Your Queries

Create and customize the data queries you want to extract the right information in real time.

Explore & Report

Visualize data through dashboards, analyze with local AI models, and send automated reports by email.

LUCA
Business Data Service

Your Data. Your AI. Your Control.

Discover a new era of Business Intelligence powered by local AI. Build, analyze and scale securely within your own infrastructure. Fast, compliant and effortless.

AI-Powered Insights
Uncover trends and key metrics instantly with integrated, fully local AI models and LLMs.

Intuitive User Interface
Enjoy a clean, modern workspace built for clarity, speed and effortless exploration.

Seamless Integrations
Connect effortlessly to your databases and APIs like MySQL, PostgreSQL, SQL Server and more for global analytics.

Real-Time Analytics
Query live data directly from your sources without storing it, instant, compliant and always secure.

On-Premise Deployment
Run LUCA BDS entirely within your infrastructure. Full control, zero data exposure, total compliance.

Automated Notifications
Schedule and receive email reports automatically. Stay updated without manual checks.
